Experience

Lead Product Designer

MathCo

Mar 2023 – Present
Bengaluru, India

2025 NucliOS – Centralized Ecosystem & Platform Architecture

- Driving centralized platform architecture, unifying fragmented products into a single NucliOS ecosystem with structured workflows, artifact organization and project-based management.
- Designing a collaborative workspace for multiple personas and teams, applying persona frameworks, usability analytics and governance systems.
- Leading cross-functional workshops to gather insights and feedback, fostering a culture of innovation that drives continuous improvement.
- Collaborating with product managers and engineers to define user requirements and translate them into actionable design specifications.

HIGHLIGHTS

- Ran a series of design sprints that sped up prototyping and **reduced time-to-market** for new features.
- Led process improvements that made the design team **measurably more efficient**.
- Raised team productivity** by introducing agile methodologies and collaborative design practices.

2024 NucliOS – Modular Bento Theme & Design Leadership

- Shaped a modular, Bento-inspired design approach with flexible, reusable components adaptable to diverse business requirements.
- Mentored and trained campus-hired designers while initiating the Decision Flow project to capture user needs and strengthen feature prioritization.

2023 NucliOS – Rebrand & Brand Alignment

- Repositioned platform through Co.dx-to-NucliOS rebrand, aligning product with MathCo brand guidelines and introducing a grid-based visual system.
- Established the organization's first design system, creating scalable and consistent UX foundations across the platform.

2022 Co.dx – Internal AI Platform & UX Foundations

- Advanced internal AI platform Co.dx via reusable artifacts and workflows.
- Drove user research and usability feedback cycles, designing foundational product features and translating requirements into intuitive experiences.

UX Designer

Data Science & Product Studio

Jun 2019 – Mar 2023

- Joined as first UX designer at a data science company.
- Introduced design-thinking across data products and simplified complex analytics workflows into intuitive experiences.

Fashion Designer

Across Boutique, Retail & Export Houses

Jul 2014 – Dec 2018

- Practiced across boutique, retail, and export houses.
- Built strong foundations in aesthetics, storytelling, form studies, client collaboration, and production workflows.

Soft Skills

 Innovator
 Thinker

 Collaborator
 Change Agent

Skills

Product Design UX Architecture Information Design
Design Systems Systems Thinking Data Visualization
User Research Usability Analysis Visual Storytelling
Problem Solving AI Product Design Experience Design
Cross-functional Collaboration Stakeholder Engagement

Education

NIFT
National Institute of Fashion Technology (NIFT)
Bachelor of Design (B.Des)
2014 – 2018

Technical Skills

 Figma · FigJam · Miro
 Design Systems & Tokens
 Prototyping & Wireframing
 Info Architecture & Data Viz
 HTML · CSS · React Basics
 Claude Code · Codex · Antigravity · ChatGPT · Perplexity

Profile Summary

 **6+ years of experience**
Shaping data-driven products and digital experiences, backed by data science, information design, UX architecture and visual storytelling.

 **Design, data & technology**
Combines design expertise with hands-on understanding of full-stack product development and AI-enabled solutions.

 **Systems thinking**
Translates complex business, analytical and user requirements into clear, intuitive, scalable product experiences.

 **Design systems**
Reusable frameworks and scalable UX foundations that drive consistency and long-term product evolution.

 **Cross-industry perspective**
A data science environment brings wide understanding of business problems, contexts and user needs.
